PROPOSED INFORMAL TRADING PLAN FOR WARD 47

Background

The informal trading plan policy and the By-law requires that trading plans be developed to regulate informal trading in a geographical area. The purpose of the Hanover Park trading plan is to manage, regulate trading areas, improve service delivery, as well as to provide security of tenure to informal traders within Hanover Park. Over the years, the Hanover Park Informal trading market has been self-managed, which means that it has been managed by the traders with the help of an elected committee- elected by the traders.

The role of AED has been mainly on providing security services to secure the facility against vandalism, do repairs and maintenance on the facility, as well as provide skills training to the elected committee to strengthen the organisation. Other departments like MURP have spent budgets to upgrade the market. Despite these contributions, the management and regulating the market has been a challenge. As a result, the market has been a subject of vandalism, unregulated trading and no set tariff fees to at least contribute to the City's revenue.

In response, AED undertook the development of a trading plan for the Hanover Park market in line with section 6 of the Informal trading By-law and the Standard Operating Procedure (SOP) for the development/review of trading plans within the City of Cape.

The trading plan will help the City to regulate informal trading in the space, improve the management and service delivery in the market. Furthermore, more trading opportunities will be found to attract more traders and customers to contribute to economic growth in the market.

VOORGESTELDE INFORMELEHANDELSPLAN VIR WYK 47

Agtergrond

Die informelehandelsplanbeleid en die Verordening bepaal dat handelsplanne opgestel word om informele handel in 'n geografiese gebied te reguleer. Die doel van die Hanover Park-handelsplan is om handelsgebiede te bestuur en te reguleer, dienslewering te verbeter, asook om handelsekuriteit aan handelaars in Hanover Park te bied. Vir baie jare is die Hanover Park-informelehandelsmark onder selfbestuur, met ander woorde dit is bestuur deur die handelaars met die hulp van 'n komitee wat deur die handelaars verkies is.

Die rol van AED was hoofsaaklik om sekuriteitsdienste te verskaf om die fasiliteit teen vandalisme te beskerm, herstelwerk en instandhouding aan die fasiliteit te doen, asook om vaardigheidsopleiding aan die verkose komitee te bied om die organisasie te versterk. Ander departemente soos MURP het begrotings toegewys om die mark te opgradeer. Ondanks hierdie bydraes was die bestuur en regulering van die mark 'n uitdaging. Gevolglik was die mark blootgestel aan vandalisme, ongereguleerde handel en geen vasgestelde tariewe om minstens tot die Stad se inkomste by te dra nie.

In antwoord hierop het AED die opstel van 'n handelsplan vir die Hanover Park-mark ooreenkomstig artikel 6 van die Verordening op Informele Handel en die standaardbedryfsprosedure (SOP) vir die opstel/hersiening van handelsplanne in die Stad Kaapstad onderneem.

Die handelsplan sal die Stad help om informele handel in hierdie ruimte te reguleer, en die bestuur daarvan en dienslewering in die mark te verbeter. Verder sal meer handelsgeleenthede meer handelaars en klante lok om sodoende tot ekonomiese groei in die mark by te dra
